*Despite the long attribution to the function of voice processing, just as its name, AV Voice Changer Software Diamond Edition proves able to bring out far more practical benefits.*

16 August 2006- Despite the long attribution to the function of voice processing, just as its name, AV Voice Changer Software Diamond Edition proves able to bring out far more practical benefits, in which composing ringtones is considered one of the most fantastic favorites. Further information of the software is located at: <http://www.audio4fun.com/voice-over.htm>.

Primarily, AV Voice Changer Software Diamond is developed to serve the increasing need of voice disguise in online communications which are mainly via PC-to-PC or instant messenger (Yahoo!, AIM, MSN, Skype, Ventrilo, Teamspeak, etc.) and PC-to-Phone. However, the program now expands its capabilities to modifying both offline and online audio streams as well as playing and recording sounds. It becomes a powerful audio studio processing many audio related works, one of which is ringtone producing.

What makes a ringtone is its very uniqueness, and this is where AV Voice Changer Software Diamond perfectly does its job. Apply a “nickvoice” or adjust the Pitch and Timbre to turn your voice or vocals of songs to a stunning voice of a charming gentleman, naughty girl, wise lady or cute baby. Also, you may use the huge collection of sound effects to color your voice or a piece of music and create more special ambience, such as Radio, Reverberation, Orchestra, Raindrops, Big Hall, Behind the Wall, Cool Stereo, just to name a few. Then the advanced recorder is right at hand for you to record newly mixed voice or music clips to set them as outstanding ringtones and impress people around. Besides, this recorder is a perfect tool to capture online songs so that you can keep it in your own music library for later enjoyment or use as ringtones. Remember to save recorded files in the mp3 or wav format to ensure they will be easily imported to most today’s mobiles.

“With the help AV Voice Changer Software Diamond, you can free your creative mind and let it compose awesome ringtones for your cell phone,” enthusiastically said Terry Vu—Audio4fun Lab Manager.

“Actually, there is no limit in the number of purposes that our program can fulfill. You may see that it can work fine to serve even an unrelated field like ringtone production, let alone its specialized aspect of voice and audio modification.”

About Avnex Ltd.:

Throughout many years of development, Audio4fun has been promoting audio and video software technologies and specializing in three core areas: Audio and Video Morphing Algorithms, Audio and Video Stream Interception, Audio and Video Real Time Effecting and Webcam Morpher. The wide range of products of Audio4Fun is detailed on <http://www.audio4fun.com>.
