

Techkat Enterprises Announces Selection of Predator Marketing System

By Kathy Maestas/Techkat Enterprises

Dated: Sep 27, 2006

Techkat Enterprises announces selection of Predator Marketing System as the best automated system for generating immediate income while building multiple streams of residual income.

Kathy Maestas, CEO of Techkat Enterprises, <http://techkat.net>, announces the association of Techkat with the newly launched Predator Marketing System, <http://predatormarketingsystem.com/katmae>.

Ms. Maestas states that a number of automated marketing systems were evaluated before selecting Predator. Systems like Prosperity Automated System (PAS), Emerald Passport, Coastal Vacations, and Liberty League were evaluated. Members of those programs were contacted for feedback. While their comments were generally positive, the newer Predator Marketing System was chosen for a number of reasons that are paramount in recommending a work from home program to Techkat's clients and partners.

Among the deciding factors was:

- Ongoing cost: The Predator system itself has no ongoing monthly costs, unlike some systems that require the purchase of monthly Leads Packs at a cost of hundreds of dollars per month. Predator recommends the Veretek system, <http://techkat.veretek.com>, for lead generation at the very reasonable cost of \$41.95 per month for an unlimited number of fresh, targeted leads.
- Training: The Predator system offers live, interactive training in conference rooms six days a week. This lets new members get off to a quick start, teaches them exactly what to do to be most effective and lets them ask questions and get answers. In addition, the Predator system is backed by the highly acclaimed Mentors On A Mission training courses that have been updated and expanded in anticipation of the launch of Predator. This pre-recorded training is available online 24/7 and is responsible for many successful Internet business careers.
- Support: The Predator System is a product of Al Turnquist, who is one of the most respected and successful marketers in the United States. Superior customer service is his passion. In addition, there is a strong esprit de corps among Mentors participants, past and present. All members receive one-on-one mentoring in addition to the other training.
- System: The Predator System promotes itself and up to six additional businesses or services that each member chooses. The system makes the sales presentation and a team of professionals follows up on requests for additional information and closes the sales. This allows participants to generate immediate cash while building multiple residual income streams, all while working from home.

Ms. Maestas reports that sales of the Predator Marketing System have been very strong. There has even been an influx of people from PAS, Emerald Passport, Coastal Vacations and Liberty League into Predator because they can see the advantages of the system over the one they are currently using.
