

How to compress file to smaller size with Stuffit?

Stuffit is a powerful file compression program, which is better than winzip and winrar. It supports over 25 compressed formats, and could compress files up to 50% smaller than original file.

Jan. 6, 2007 - [PRLog](#) -- Stuffit is a powerful file compression program, which is better than winzip and winrar. It supports over 25 compressed formats, and could compress files up to 50% smaller than original file.

Multiple files can be compressed into one archive at one time. Photos are also supported. After compression, there is no any quality loss.

To compress file with Stuffit, just simply select all of files you want to compress and right click them, and then choose “stuffit => compress with stuffit” in the pop up menu. Then the compressed file will be automatically created.
