

Skelta SharePoint Accelerator 2007 Previewed at SharePoint Conference 2007

By Skelta Software

Dated: Feb 19, 2007

Skelta Software offered a sneak preview of their SharePoint Accelerator 2007 at the first Microsoft European SharePoint Conference 2007, Berlin.

Skelta Software offered a sneak preview of their SharePoint Accelerator 2007 at the first Microsoft European SharePoint Conference 2007 that was held between February 12 – 14 at Berlin, Europe. The next generation Skelta SharePoint Accelerator is geared to be compatible with Microsoft Office SharePoint Server (MOSS) 2007. In addition, the Accelerator will provide powerful workflow capabilities to SharePoint installations. Built on Skelta BPM.NET, Skelta's award-winning BPM workflow component, SharePoint Accelerator will support both SharePoint Server and SharePoint Services installations.

SharePoint Accelerator 2007, the next version of Skelta's SharePoint Accelerator extends its integration with Microsoft Office 2007 to all its components including SharePoint 2007, Exchange Server 2007 and Windows Vista. Skelta SharePoint Accelerator 2007 is packed with new features and enhancements such as the Skelta Process Modeler within SharePoint, integration with BDC, IRM, Excel Services and KPIs, and workflow initiation on document libraries, lists and content type.

Skelta's VP – Strategic Partnership, Paritosh Shah said "We have been working closely with Microsoft to enable seamless integration with Office 2007. The SharePoint Accelerator 2007 has been built on top of the new functionalities in our recently launched Skelta BPM.NET 2006. This will create a powerful BPM-enabled platform for collaboration. The first ever European SharePoint Conference 2007 at Berlin has offered us an excellent forum to present our product to a discerning audience".

About Skelta

Skelta Software is an innovative software product company specializing in enterprise-wide Business Process Management (BPM) and Workflow solutions for small to large-sized businesses worldwide. Its flagship product, Skelta BPM.NET 2006 is a BPM workflow software that is built on cutting-edge Microsoft .NET, XML, and Web services technologies. It is also the world's first embeddable workflow engine. Skelta enables business users and developers to design and deploy workflow applications using software tools with which they are already familiar. In addition, Skelta enables businesses to leverage on their existing investments in Microsoft technologies such as InfoPath, BizTalk Server, and SharePoint.

Skelta's products have won several awards at industry forums such as Microsoft 2006 Regional Winning Customer Award, Best of Tech Ed in the Software Components category at Microsoft Tech-Ed, MSD2D's People's Choice Award and NASSCOM IT Innovation 2005 Award. Skelta has also been named one of Asia's top 100 companies by Red Herring magazine and acknowledged as one of the fastest growing technology companies in India and Asia Pacific region by winning Deloitte Technology Fast 50 India & Deloitte Technology Fast 500 Asia Pacific 2006 Awards.
