

## Adipex Diet Pill: Short-Term Obesity Management

By Sean Toretto

Dated: Feb 21, 2007

*Obesity can make you feel depressed, and also feel low-esteemed. Don't get tortured in the hands of obesity, when you have a solution.*

Obesity can make you feel depressed, and also feel low-esteemed. Don't get tortured in the hands of obesity, when you have a solution. 37.5mg Adipex diet pill which is marketed by Gate Pharmaceuticals which can effectually resolve your weight loss concerns.

Senior Dietician Martha Anholt, working with Online Adipex comments, "Adipex diet pill is a short-term medication which proven effectual in the treatment of obesity". Adipex diet pill is usually recommended for a span of 8-12 weeks usage along with an entire weight loss schedule in the treatment of obesity. It works by affecting the specific neuro-transmitters which regulate food consumption of the body. When these specific neuro-transmitters are affected, it sources reduction in appetite and in turn weight loss.

Usage of Adipex diet pill may source a few side effects as a consequence of bodily changes to this medication. Some of these side effects can be accounted as dizziness, nausea, headache, unpleasant taste in mouth. These Adipex side effects are usually mild and fade away with continual usage. Yet, if these side effects become bothersome or any other side effects occur, consult your doctor for immediate medical attention.
