

Inventory Solutions Launches New i-Presentation & Website

By Inventory Solutions, Inc.

Dated: Feb 24, 2007

Inventory Solutions Inc. is pleased to announce the launch of a new iPresentation, online presentation, and website that offers solutions to help companies optimize slow-moving MRO spare parts inventory levels.

(Akron, Ohio) February 2007 – Inventory Solutions Inc. is pleased to announce the launch of a new iPresentation, online presentation, and website that offers solutions to help companies optimize slow-moving MRO spare parts inventory levels.

Inventory Solutions Inc. offers a series of unique services that identify and provide recommendations designed to improve availability, reduce downtime, and minimize overstocked inventory. Their techniques focus on critical, rarely-used parts that typical inventory management programs can not assess. ISI's risk-based tool can also be applied to spares for new equipment.

The iPresentation will be released and announced in the February 28 ReliabilityWeb.com newsletter (www.reliabilityweb.com). The title is "Optimizing MRO Inventory — What's In It For Maintenance". The iPresentation demonstrates solutions and benefits for maintenance to improve the management of spare parts inventory while maintaining safe, efficient, uninterrupted production.

The new Inventory Solutions Inc. website provides visitors an overview of the company and their services, online demonstrations, and insights based on real world results. The fact is that 80%-90% of the inventory in a warehouse is used less than once a month, and 50% or more has not been used in years. Managing these items requires WebRUSL, a risk-based tool unique to ISI. For over twenty years, Inventory Solutions' services have been proven to provide a method to effectively evaluate rarely-used inventory to improve availability and institute best inventory management practices for MRO spare parts.
