

The Solution for Chronic Fatigue has finally arrived

By Easy Life Inc. Samvel Saribekian

Dated: Apr 03, 2007

Leukomeal is a high potency antioxidant and the first proprietary functional medical food extracted from probiotic culture proven to reduce oxidative stress and fatigue, and its effectiveness can be measured by a GGT test.

Easy Life Inc is on a mission of bringing Leukomeal to the world. It is a functional medical food designed for the dietary management of fatigue, who's effects are verifiable by a ggt (gamma glutamyl transferase) test.

Research performed in medical labs word wide in the past few years revealed that the gamma-glutamyl-tranferase (GGT) enzyme is the primary indicator of systemic health of human body. Increased GGT activity as measured by a routine laboratory test of blood or urine indicates problems in any of human organs: heart, brain, digestive system, not only liver as it was thought earlier. GGT activity is strongly elevated if we are ill, sick or chronically tired (fatigue) due to oxidative stress in our system.

Thus by regularly measuring GGT level we can monitor our health. Normal (low) level of GGT activity indicates strong immune system capable of protecting our body from oxidative stress produced by a disease.

Good news is that scientists found natural substances to control and normalize GGT activity even if our health is strongly deteriorated by a disease, such as cancer, Parkinson's disease, cardiovascular disease, Hepatitis C, Diabetes and other significant health problems.

Leukomeal is a high potency antioxidant and the first proprietary functional medical food extracted from probiotic culture proven to reduce oxidative stress and fatigue, and its effectiveness can be measured by a GGT test.

Leukomeal is 14 years old, but during this time it was not widely marketed, untill Easy Life Inc took on the task. It has no side effects and is completely natural.
