

VereConference - The State of the Art Web Conferencing System

By Patricia Brucoli, the3rdpartynetwork.com

Dated: Apr 22, 2007

Inetekk the Innovator does it again! Their premier internet marketing tool suite, Veretekk, has recently launched it's latest web conferencing application - VereConference - and it is state of the art, clear as a bell and runs like a charm!

VereConference leaves all other web conferencing systems in the dust. There is just no comparison to any other room for accessibility, affordability, ease of use, functionality or sound quality. Hands down, VereConference is as good as the technology gets.

- * VoIP - no long distance charges - have the whole world in for a free chat
- * 100% web based - no software required
- * Inexpensive PC microphone and speakers are all that is required
- * Record audio & visual session in one click , for all participants
- * Synchronized browsing - display websites, files, photos, or graphics from the task bar
- * Upload PowerPoint presentations with a click
- * Whiteboard - interactive for all conference participants
- * Stream music
- * RSS feeds
- * Scalable from a 3 person capacity to 1000+
- * Prices start at a mere \$11.95 per month
- * No contract beyond month-to-month

Try a 3 person room for free, any time, at <http://www.VereConference.com>

Interactive is the buzz word in 21st century internet marketing. Get a VereConference web conferencing system to use for meetings with prospects, for customer and member support, or for training.

Flat communications are, well, just that -- flat. Be internet savvy and interact in real time to solve problems, and convey technical concepts with audio and visual clarity.

Communication is the key to everything and every effort should be taken to do it well, if one wants their business to be a success. Web conferencing is the ultimate tool to promote and maintain any business, whether off or online.

Get VereConference and get the very best there is!
