In the final analysis, all six of the people who responded that they are finding success easy all currently have mentors. In the case of six of the respondents that currently have mentors, they are still finding it difficult to achieve success. 23 of the respondents who do not have mentors are all finding it difficult to achieve success.

"It is really not that surprising that people who are finding it difficult to achieve success do not have mentors," said Jim Peake, CEO of My Success Gateway, LLC and now we have the data to support those findings." My Success Gateway, LLC consistently teaches that there are 3 key human factors for success:

- 1) strengthen your private network (includes your mentor)
