New Medical Horizons Inc. crosses new milestones in medical tourism with the unprecedented success of its 'Visit USA' luxury medical and health travel and relaxation tour package.

New York, NY - New Medical Horizons Inc. (<http://www.newmedicalhorizons.com/>) crosses new milestones in medical tourism with the unprecedented success of its 'Visit USA' luxury medical and health travel and relaxation tour package. The package is meant to serve a niche tourist market where travelers from all over the world come to the United States for a luxurious vacation package combined with access to cutting-edge medical treatment at the finest healthcare centers in the country.

Treatment and surgery included, but not limited to, in the package are cosmetic and facial surgery, prosthetics evaluation and fittings and obesity treatment. An advisory board of prominent medical practitioners, well known in their fields and each having years of experience, provides medical supervision and assistance to staff and clients.

Statement from New Medical Horizons Inc. CEO Rob Zachariah, "We believe that the concept of medical tourism works in both directions - to and from the U.S. There are individuals here who seek affordable and / or more readily available treatments outside the U.S. and there are others who would rather have their post-operative stay in the U.S.

We have a lot of clients being referred to us from our overseas offices and through our website. In spite of the huge spurt in growth under the 'Visit USA' package, we are still anticipating more than doubling the total number of visitors coming into the U.S. under this package in the next two quarters."
