*Dean's website is a huge collection of tattoo designs which is getting big hits from people all over the world particularly from women. His tattoo designs are unique and show his brilliance.*

**July 21, 2007 - [PRLog](#)** -- Fl, USA, July 22,2007.....Body art and tattoos have become so popular now that people who would have ran the other way are exposing their skin to the tattooists needle. It is not uncommon to get a glimpse of some office worker in the boardroom sporting a sexy rose tattoo on her chest, floral design on her lower leg or even some tribal artwork tattoos on her lower back. This is a testimony that tattoos are becoming more and more acceptable in a corporate environment traditionally no go zones for any form of personal expression.The whole field of tattoos for women is growing at a tremendous rate. If you think back even 20 years ago tattoos for women were not all that popular and most of the women getting them were keeping them covered up. However times have definitely changed and tattoo designs have really advanced at a tremendous rate. Today's tattoo have more brilliant colors and are a far cry from your grandfathers Hawaiian girl tattoo on his forearm.It used to be that women would get an occasional rose or name tattoos on their breast or some well hidden spot.

However with current fashion trends there are tons of cute tattoo designs for women out there are women are now getting tattoos at an amazing rate.

Women's tattoo designs and placement have also changed with this new growth. No longer are women getting simple tattoos that they keep well hidden. Women are now getting cute tattoo designs done and placing them in more visible places.

Some of the most popular items to get tattoos of are:

1. Shooting Star Tattoos
2. Butterfly Tattoos
3. Unicorn Tattoos
4. Angel Tattoos
5. Fairy Tattoos
6. Dragonfly tattoos
7. Flower design tattoos

The most popular places for women to get tattoos done are:

1. lower back tattoo (especially popular recently with

the whole hip hugger jeans)

2. ankle tattoos

3. front side of the hips (again hip hugger jeans have made this more popular)

4. butt cheek left or right

5. Belly button area

Another thing that this trend of women getting tattoos is that women often seek out custom tattoo designs. They don't go to the local parlor and just by a tattoo flash design that is on display there. Women seem to spend a great deal more time contemplating the tattoos that they want done and tend to have more requirements about what they want. Therefore women tend to get custom tattoo designs. This allows them to get the exact look and feel they want and a custom designed tattoo is also fit to the location on the persons body so that it fits well. Dean Camerson runs an online website which is a unique repository of unique tattoo designs. While talking to Waseem Dar, Dean said, "Tattoo My Brain has been used successfully by people all over the world to help them select the tattoo design of their dreams... All without the need to rush and regret it later. Scroll down to read some comments by a number of happy customers who have already experienced the power of this revolutionary tattoo collection." His website is really humming with tattoo lovers who are always looking for unique tattoo
