

## **Eskhosting Is Launching Statistics Reports For The Web Hosting Services**

*By Anna Berk, CRM director of Eskhosting.*

*Dated: Sep 11, 2007*

*Eskhosting is announcing the introduction of the new value-added feature for its web hosting services – statistics reports, one of the latest in-house products.*

Eskhosting is announcing the introduction of the new value-added feature for its web hosting services – statistics reports, one of the latest in-house products.

From this moment, the statistics is available on customers` account manage page and reflects bandwidth usage for all customers` web hosting accounts. Bandwidth statistics includes incoming and outgoing traffic, mail SMTP and POP traffic, any other traffic related to the domain name and as well provides the summary of the incoming and outgoing bandwidth usage.

This very feature has been already recognized by Eskhosting customers as one of the most useful and important add-on services as it allows to monitor current daily traffic, monthly traffic usage, view history of traffic usage for the previous billing periods and calendar months and thus allows customers to plan account upgrade and expenses accordingly and in a timely manner.

About Eskhosting:
