

New Hotel Reservation Software HotRez 1.02 Released

By ProData Software

Dated: Dec 07, 2007

After the successful launch of DiveShopManager 2.02, ProData Software now released the new Hotel Software 'HotRez 1.02'. The easy to use room booking software was developed in Europe and Asia to avouch for greatest possible flexibility.

During the past few years, computers and operating systems have become more reliable. Just about every business now a day relies on a computer in their office. How this fact is going to affect a business ends up in the use of the right software for this particular business.

More and more software pops up on the market and the consumer gets confused about the gross variety of available products in each section. Therefore most software developers release a demo- or trial version to try before buy. So does ProData software with its newest release *HotRez 1.02* .

The newly released **Hotel Reservation Software *HotRez*** is an easy to use Room Booking Software that allows hotels and resorts to organize their customer data, print invoices, check for available rooms, send confirmation e-mails and newsletters to customers, make reservations and bookings and more.

Now we have a new hotel reservation software on the market that is cost effective and does not require a PHD from the user. Because of its low price, the room booking software *HotRez* is suitable even for smaller motels, inns and bed & breakfast houses.

The hotel management system *HotRez* does also take full control over a hotels rental affairs. Whether it is a billiard table, a surf board or a car, *HotRez* can be configured for hourly, daily or weekly rentals.

HotRez also controls all sales made at a hotel or resort. Anything a hotel has to sell, whether it is a breakfast or a cocktail at the hotel bar, can be added and sorted in categories.

The cash management of the reservation software *HotRez* can take control over all expenses and income from invoices and quick invoices. Free scalable accounts can be added to the cash box. Statistics for the accounts can be created for any period of time. A daily journal can be printed from all income and expenses. Monthly reports, occupancy checks, check in and check out lists can also be printed.

The new hotel reservation software *HotRez 1.02* is a room booking software that allows hotels to integrate an affordable software solution in to their working environment. *HotRez* is an easy to use booking system that is capable of managing most concerns of any hospitality business.

###

Prodata Software is developing custom made software since 1984 in Europe and Asia. The company has developed DiveShopManager 2.02, a management software for dive centers and dive resorts that is about to become a bestseller.
