

Bioplasty Panama and Medical Tourism.

By south seas pharmaceuticals

Dated: Dec 31, 2007

Dr. Guido Spadafora today announced to www.nipandtuckpanama.com that he would be introducing Bioplasty as part of his Panama clinics port folio .

Dr Spadafora said that the procedure will be popular based on studies found in other countries like Brazil. Due to the fact that it does not make use of cuts, it doesn't need great anesthesia; it allows the patient to return to his routine immediately after.

Bioplasty is an offshoot of traditional filling techniques, but it goes beyond filling. While in filling the biomaterial is lodged inside or just under the skin, in Bioplasty the application is done at much deeper levels, allowing the creation of shapes and angles.

Dr. Spadafora said that no technique is free of incisions. We only make a tiny hole with a needle that serves as entry point for microcannulae that will deliver the biomaterial at the desired depth and location, without harming the tissues.

The biomaterial utilized is composed of PMMA (Polymethylmetacrylate) microspheres. It does not cause allergies, it does not migrate (it does not move around inside the body), and it is non-toxic. PPMA and silicone are unrelated.

Nipandtuckpanama.com are informed that the traditional surgical technique removes excesses but does not add beauty. Bioplasty renews and enhances beauty. The technique can create harmonious lines for those who do not have them, enhance beauty, recover the contours of an aging face or add to the results of previous cosmetic surgery. Through bioplasty we can transform a person who is not beautiful into a beautiful person, and make a beautiful person even more beautiful.

Bioplasty has already been used almost secretly by famous, models, artists, and people who depend on good looks all over the world. Many international stars are anonymously having treatment where the procedure exists. Bioplasty is getting more popular. Not only for famous but also ordinary people long for its benefits and a revolution in medical aesthetics begins to take place. Arrangements for the entire Bioplasty procedure including accommodation and transfer can be made through www.nipandtuckpanama.com
