

MCITP made easy with uCertify 70-526 Practice test

uCertify, a leading name in IT certifications, is going to release its new simulation test for MCTS.NET 70-526 CSHARP exam on February 15, 2008. Grab this opportunity to get the simulation test at a discount price before its release date.

Jan. 22, 2008 - [PRLog](#) -- The MCTS.NET 70-526 CSHARP practice test is designed to enable you to pass the exam effortlessly. It comes with a total of 150 questions, 150 pop quizzes, 100 study notes, articles and study tips. All the questions come with a detailed analysis of the correct as well as incorrect answers.

The PrepKit has some special features such as tagging, rating of questions and bookmarking, which can prove to be very effective. These 3 features appear everywhere such as while taking the test or while going through the flash cards. So when you tag or rate a particular topic you would become more confident when you witness it again in a test or while revising. You can download free copy of the practice test from <http://www.ucertify.com/exams/Microsoft/70-526-CSHARP.html>.

The best part of tagging questions is that they can be used while creating a custom test too. Suppose you tag certain questions or topics as difficult either while giving a quiz, reading flash cards or giving a test, then all these tagged questions can be clubbed together to form a new custom test.

Vidya Vrat Agarwal, a .NET expert, said, "Various types of practice tests help you to be tough and well prepared when you appear for the real test. Each test covers all the concepts as per the Microsoft requirements and helps you to prepare gradually and also to see your progress. I believe that this exam is one of the most usable exams, as it opens the entry for three other MCTS exams as well." You can read more on this at <http://dotnetpassion.blogspot.com/2007/12/review-of-ucert...>

"uCertify PrepKit comes forward as a breath of fresh air to break away the eeriness which comes to people while facing an exam. The look of the PrepKit is unique and new such that it compels us to explore more than the PrepKit itself." said Nitin, another software expert on Java/J2EE exam.
