

Hi-Tech Torrevieja Health Service.

By LiveMedCoast Sl.

Dated: Feb 05, 2008

By subscribing to the health Services mobile text service, you can find out which A & E department has the least waiting time

Since the opening of the New Torrevieja Hospital, the health Service has improved beyond everyone's expectations.

Torrevieja Health service in the past has struggled to cope with the ever changing population, and demand has always been difficult to judge. Particularly in the height of the tourist season, when the influx of tourist and home owners, from overseas and nationals alike. This influx has always but a heavy burden on the emergency system in particular. But due to the new mobile phone text system this no longer is the case.

This innovative idea is simple, all you need to do is subscribe to the text service and then when you need accident and emergency all you'll need to do is text "Urgencias" to 5013. You will then be informed of the waiting times in each of the emergency departments throughout the area. This in turn allows the hospital to reserve it's accident and emergency unit for the most serious of cases.

But it's not just the A and E department that is getting rave reviews a recent survey had very positive comments. The out patient dept. received 90.7%, in patients got 95.5%,
And the Emergency Dept. 89.8%....

In particular the patients surveyed at Torrevieja Hospital commented most about, Hygiene, security, confidentiality and the Nursing staff.

Torrevieja Hospital has become an asset to the area, with a very efficient service much appreciated by residents and visitors to the area....
