

Magic Lens Max - A real computer vision magic!

By VisionSuit Software

Dated: Feb 16, 2008

Magic Lens Max is a real-time, intuitive and advanced screen magnifier and desktop viewer to zoom, rotate, enhance, view and capture any area of the screen display.

Ever puzzled by the weird CAPTCHA characters which tried to determine "whether you are a real human"?

Ever stretching your neck hardly to read some small grayed or blurry texts on the screen?

Ever curiously viewing the graphic details hidden in the shaded or dark areas but you can see nothing?

Can you imagine that an "Intelligent Magnifying Glass" which tracks the keyboard focus automatically to magnify and enhance the focused area very intuitively while you are typing texts or editing documents?

Can you imagine that you can use a "Magic Lens" to zoom and rotate any part of a photo arbitrarily, just by rolling the mouse wheel?

...

So try this handy yet powerful viewing utility - Magic Lens Max for free!

The latest 30-day FREE trial version can be downloaded at:
