

Latest Nokia N95 8GB deals from all retailers - www.top-mobile-deals.com

By top-mobile-deals.com

Dated: Feb 18, 2008

We compare over 50,000 deals from all retailers!

The Nokia N95 8GB is an updated version of the standard N95. It has a larger screen – now 2.8 inches, 8GB memory, an improved battery life and is dressed in black. With a 2-way slide mechanism, a numeric keypad slides out from one end while dedicated media keys slide out from the opposite direction, converting the display into full screen landscape mode. With built-in GPS and Nokia Maps application you can locate your current position at any time, find specific routes or locate services such as restaurants and hotels and covering more than 15 million points of interest. The 5 megapixel camera is one of the best cameras ever seen in a mobile phone and the N95 has a TV out port, enabling users to easily view photos and videos on a TV screen. The N95 is a 3G phone, which means fast web browsing, video streaming and music downloads.

###

www.top-mobile-deals.com is a price comparison web site for mobile phone deals.

Mobile phone retailers, such as The Carphone Warehouse, Vodafone, Orange and T-Mobile, provide this site with information about their offers. This web site automatically compiles that information every day, allowing you to quickly and easily compare tens of thousands of deals from many of the UK's leading online retailers.
