

Dive Center Software - New Update Released

By ProData Software

Dated: Feb 20, 2008

DiveShopManager 2.03 is designed for Dive Resorts! If you own or manage a Dive Center or a Dive Shop this software will without doubt help to increase your sales and gain a higher profit from your business.

DiveShopManager 2.03 Updated

During the past few years we witnessed, computers and operating systems becoming more reliable. Just about every serious business nowadays relies on a computer in the office and the scuba diving industry is no exception. How this is going to affect a business depends widely on the use of the right software for the particular business. New consumer software is released on daily bases and the user gets confused about the gross verity of available products for each market. Therefore most software developers release a demo- or trial version to try before buy. Testing a software and trying to adjust it to the own business is the best way to tell if it fulfills your expectations. Software that is especially designed for a certain business though usually comes with a large price tag.

After the successful launch of DiveShopManager 2.0, in February 2006 ProData Software kept continuously working on the dive center software to make it even better. Many requested features from dive shop managers have been added since and now, two years later, DiveShopManager has become the perfect tool for any dive center in the world. More details are to be found here: <http://diveshopsoftware.com/>

With DiveShopManager 2.03 you have a dive center software at hand that is cost effective and does not require a PHD from the user. Although setting up the software for an individual dive resort is a piece of work until all data is entered, it will save the invested time multiple times during it's use later on. This unique and user friendly software has been developed especially for dive resorts and live aboard operators.

Manage Student Record Files, Scuba Diving Courses, Fun Dives, Staff, Wages and Invoices, Daily Revenue, Suppliers, Rentals and Sales. This software package provides you with an overview on your hotel/resort, your dive school, your dive boat(s) and your sales and rentals at any time. Every part of the software is freely scalable to make it work for any size of dive center.

DiveShopManager will help to increase sales and gain a higher profit from any Dive Shop or Dive Center. DiveShopManager 2.03 will also help to manage and monitor all aspects of a Dive Center and clear statistics present a great overview on all parts of the business. The best part though is that you can run the software for a full month without any obligation and ProData Software has a great support that will immediately answer all questions you might have. The software comes with full support and a very detailed user manual.
