

Stelera Wireless Selects BandRich for High-Speed Modem Solutions

Stelera Wireless, the first company in the nation to introduce its 3.5-generation cellular technology have selected BandRich Inc., as supplier for wireless broadband solutions.

Feb. 26, 2008 - [PRLog](#) -- Oklahoma City, OK - Stelera Wireless announced they have selected BandRich Inc., as supplier for wireless broadband solutions via the Stelera C105, a data modem that allows users to enjoy high-speed Internet surfing on their computers. This latest technology improves wireless signal reception, enables higher data transmission rates, and saves downlink capacity for more users. Moreover, the Stelera C105 reserves an external antenna plug for better reception at outlying or weaker signal areas.

"It's exciting to be working with BandRich to bring new value to our rural customer base," said Ed Evans, CEO of Stelera Wireless. "By utilizing our wireless expertise and BandRich's technological acumen, we are pushing the next generation of wireless speed, capacity and quality forward.

"BandRich is very pleased to work with Stelera Wireless in providing such a high speed mobile broadband experience in the United States," said Dr. Wen-Yi Kuo, BandRich's co-founder and CEO. "With this new spectrum (AWS band) activated in services, it is our great honor to provide the key device in facilitating the mobile broadband services to customers."

Evans noted that Stelera Wireless is the first company in the nation to introduce its 3.5-generation cellular technology called HSUPA (High Speed Uplink Packet Access). "The technology is so advanced that it will produce download speeds of up to 7.2 megabits per second (Mbps) and upload speeds of up to 2 Mbps," he said.
