

Somerset County Modular Home Company Reduces Construction Costs

Modular home construction costs are reduced by Modular Homes, Inc. through a Buy Direct Program for modular homes in Somerset County, NJ. Builders and homeowners can successfully design, purchase and finish their custom home saving money.

March 8, 2008 - [PRLog](#) -- Modular Homes, Inc. (MHI) of Edison, New Jersey, now offers a **Buy Direct Program** allowing customers and builders to **buy homes directly** from the manufacturer in **Somerset County**. MHI will leverage their experience and relationships with the modular manufacturer and network of pre-qualified sub contractors to **save** their clients thousands of dollars on their new home.

Building a modular home has a distinct advantage over the traditional site-built home. In most cases, 85% of the work to construct a **modular home** is done at the factory. This in turn reduces the scope of work needed to be completed on the job site. "We pride ourselves on the quality of our modular homes as well as our commitment in helping our customers build their quality dream home," states David Cooper, President and CEO of Modular Homes, Inc.

The Buy Direct Program offers:

- step-by-step methods to select, design and price your home
- partnership with the manufacturer to define and coordinate blueprints and the home order based on the your selections, specifications and ideas
- guidance in the construction process using our comprehensive construction checklist
- customer progress tracking reports for order processing and delivery scheduling of your modular home
- construction budget advice
- lists of experienced set crew subcontractors
- post-order customer service and technical assistance
- guidance in the Finance process and assistance in structuring the draw schedule.

Modular Homes, Inc. is a leader in the **custom modular hom** market, delivering superior products and unparalleled services to modular home buyers and builders in Somerset County. MHI also provides consulting services to homeowners, **architects** and **builders** throughout the United States. Adds Cooper, "We are a true custom builder. We work with homeowners and builders to allow for just about any level of customization our client's desire. From basic floor plans to finishing design touches, we assist every step of the way."
