

EZ Furniture Assembly & Interior Innovations Becomes New York city's #1 Assembly Service!

By EZ Furniture Assembly & Interior Innovations, LLC

Dated: Mar 11, 2008

New York City Entrepreneur takes his dream to a whole other level by keeping quality workmanship and customer satisfaction as the main ingredients in his recipe for success.

EZ Furniture Assembly & Interior Innovations, LLC has become New York City's #1 professional furniture, gym, & recreational equipment assembly & installation service. They also provide professional kitchen cabinet design, assembly, and installation among a plethora of other handyman services. The company is fully licensed & insured & has a team of 11 field technicians with a minimum of five years experience that will come to your home or office to complete the assembly or installations. All the technicians are required to participate in at least two forms of continued education that is directly related to the services they provide. They pride themselves on quality workmanship and the ability to schedule most projects within 72 hours compared to the bigger companies that take weeks from the time of purchase and hire their assemblers over the phone or email.

We take great pride in the work we do, and the technicians we have on our team. Every technician prior to employment must attend a two part interview process where they meet the president and the project manager and are asked questions about themselves, where they see themselves in five years, and what skills do they have to offer. If the candidate passes this initial interview he or she will be called back for a second interview where they will be given several hands on tasks to preform from assembling computer desks to cutting counters. Christopher Purnell, the President of EZ Furniture Assembly and Interior Innovations, LLC believes that this is what separates the weeds from the flowers. " We want our technicians to be able to preform as good as they speak". Purnell said " it really amazes me how these big companies are still in business with the way they hire people over the phone not knowing what they can and cannot do, never mind a background check. had one prospective candidate who worked for Impact Resources for 3 years and seemed to have learned a great deal working there but when we conducted his background check we found that he had 14 convictions for burglary & theft. This is not the kind of people we want working in our customers homes because they trust us and I will take whatever measure possible to ensure that trust is not compromised" If they pass both interviews and a background check they will work with either the Project manager or Lead technician for a minimum of two weeks to see what their actual skill level is.

Purnell went on to tell us how he started the company and what made it the success it is today. " When I started this company I had no more than a handful of tools, a shoebox of past due bills, and a passion to succeed. It was like going to school, every piece I assembled I learned something new and ways to assemble the products faster without cutting corners like many companies do. I actually enjoyed taking a box full of wood pieces and a bag of screws and transform it into a beautiful piece of furniture. I would never accept payment from a customer until the project was complete, and that is still how we operate today. I would like to one day have the big accounts that I see others have, but until then I will continue to assemble our list of satisfied customers one project at a time" Well, it is obvious that his company has come a long way from when he started. Our research found that his company is ranked #1 on Google & Yahoo, has an "A" rating on Ikea Fans, and was awarded the "2007 Superior Service Award" by Angie's List in which only a mere 5% off all the companies listed nationally are even considered for this award.

If you have ever assembled, or better yet, attempted to assemble Ikea furniture or something similar i am sure you can appreciate that there is a company available that will do the assemble for you to a showroom finish. Our research indicates that most professional companies like EZ Furniture Assembly & Interior Innovations, LLC that are licensed and insured charge anywhere from 30-33% of the retail cost of the piece

for assembly. Which in reality isn't bad considering studies have shown that it takes a mechanically inclined person 6-8 longer to assemble a piece of furniture compared to a professional assembly technician. If you are in the New York city area you can visit EZ Furniture Assembly & Interior Innovations at www.ezfurnitureassembly.com, or call them directly at (718) 541-9863.
