

Learn HTML and CSS, Easily

Output I/S has launched HTML.net, a free HTML and CSS tutorial site that makes it easy to learn how to design and develop web sites.

April 3, 2008 - [PRLog](#) -- Output I/S has launched HTML.net, a free HTML and CSS tutorial site that makes it easy to learn how to design and develop web sites. In about an hour, novice computer users can learn the essential information needed to build a web site, using nothing more than an ordinary text editor. HTML.net frees business people from the expense and frustration of hiring a consultant to put their company on the Internet. And HTML.net lets students and home users learn how simple it is to create an effective web site.

The HyperText Markup Language (HTML) tutorial begins with the basics, and introduces you to links, images, and tables. You'll learn how to develop a site that can be viewed by all web browsers on all platforms.

There are tips and tricks to make your web site attractive, fast-loading, and effective.

The Cascading Style Sheets (CSS) tutorial teaches you to separate your web site content from your design, enabling you to quickly change the look and feel of your web site. CSS-based web sites improve your search engine rankings by making it easier for search engines to find and index your content. CSS is slowly replacing table-based HTML as the design tool of choice. But the transition to CSS has been slow because CSS is difficult to learn. HTML.net makes it easy.

The HTML.net tutorials are available 24/7, without charge. Tutorials are in English, German, Spanish, French, Italian, Russian, Chinese, and more, with new translations available in the coming months.

Millions of business people, home users, and students have been avoiding creating their web sites because they think it's too much work, or too complicated. HTML.net makes it easy to learn the essential information needed to create a web site, in hours not months.

For more information, or to advertise on the HTML.net web site, visit <http://www.html.net/>, or contact Output I/S, Kaj Munks Vej 10, 3.th, 2300 Copenhagen S, Denmark. Phone: (+45) 5194 5001. E-mail: info@output.dk
