

## Build Your Own Website with New Book on Joomla 1.5

By Packt Publishing

Dated: Apr 10, 2008

*Building Websites with Joomla! 1.5 is a new book from Packt which is written as a practical step-by-step guide to building a website from scratch.*

Written by Hagen Graf, this book takes the reader through the tasks essential to create a Joomla! website as rapidly as possible.

Joomla! started as a fork from Mambo in 2005, when many of the original developers of the Mambo CMS moved to working on Joomla! It has rapidly grown in popularity and is a cutting Edge Content Management System and one of the most powerful Open Source Content Management systems in the world. It is used world-wide for anything from simple homepages to complicated corporate websites. It is easy to install, easy to manage and very reliable.

While the Joomla! CMS has the flexibility and power needed for complex, full-featured web applications; it is also simple to use to create basic websites. Its powerful, extensible template system can deal many different data types and control of user access, approval of content, scheduling of content display, and rich administrative controls are all included.

This book is suitable for web developers, designers, webmasters, content editors, and marketing professionals who want to develop a website in a simple and straightforward process. It does not require any detailed knowledge of programming or web development, and any IT-confident individual will be able to use the book to produce an impressive website. The necessary tasks are explained with clear step-by-step instructions. The author's chatty and engaging style makes this book very readable.
