

PromoManagers Expands Organic and Recycled Offerings

By PromoManagers Inc.

Dated: Apr 10, 2008

PromoManagers.com announces plans to dramatically expand organic and recycled products sourced domestically and overseas in an attempt to dramatically reduce non-sustainable products in the promotional products marketplace.

PromoManagers Inc, a rapidly growing value leader in the promotional items industry announced today that it has sourced and will soon begin offering over fifty new environmentally friendly items both online and through traditional sales channels by the end of the month. The announcement comes just a few days before Earth Day and extends PromoManagers commitment to the eco movement.

“The growing popularity of the green and environmentally friendly products has firmly established the high demand for these items over the last few months and subsequently we have continued to seek new sources and suppliers to meet that demand,” said Heather Simard, President of PromoManagers Inc.

The new ecologically friendly items are expected to be made available around or just after Earth Day and will cover all of the major industry categories. The company expects to continue to expand their offerings through May.
