

LED Light Fixtures on Display at 2008 Lightfair International Las Vegas

Source: Pasch Consulting Group

Dated: May 09, 2008

Radiant Lighting, manufacturer of Architectural LED Lighting Fixtures, will be showcasing their latest products from May 28-30, 2008 at the 2008 Lightfair International Show in Las Vegas at Booths 859 & 959.

Las Vegas — The world's largest annual architectural and commercial lighting show and conference LFI 2008, now in its 20th year, will be held May 28th through 30th at the Las Vegas Convention Center. Radiant LED Lighting will be exhibiting their newest lighting products with their parent company, The Belfer Group.

Radiant and Belfer lighting fixtures showcase the beauty of their surrounding and their products are designed to illuminate any environment where the objective is to create visual interest while respecting the architecture. Both Radiant and Belfer provide lighting specifiers with elegant solutions for high profile lighting designs.

At the 2008 Lightfair International Show, Radiant will have on display their latest products including their field curvable, Serpentine LED System, the Radiant LED Micro Track as well as the Radiant Power Cove LED Lighting System.

Radiant LED Micro Track System

The Radiant LED Micro Track system is the perfect answer for applications demanding compact track lighting and fine visual styling. The spotlights are designed to be as discreet as possible while still dissipating heat from the light source. The Micro Track system is perfect for display case lighting and museum lighting, as shown in the virtual display image above. Their ultra-compact design and lack of UV radiation is a perfect solution for museum display lighting.

Radiant Lighting is a manufacturer of LED lighting systems. They manufacture patented lighting systems for high profile projects and for the most demanding environments worldwide. LED lights create a pure spectrum of color; single source or combined to create unique lighting effects. The fixtures are small, have low maintenance costs, emit no UV rays and produce pure light at low heat. The LED Micro Track is a perfect replacement for halogen display case lighting. Color temperature for LED's in the preferred "cool white" category range from 4300°k to 5500°k.

Radiant Serpentine LED System

Architectural lighting has changed dramatically with the release of new LED technology. The ability to change the look of entire buildings, bridges and any other outdoor architectural features has given way to an explosion of cityscape redesign and artistic focus for many old as well as new buildings. Belfer group has been known for many years for providing unique solutions for field curvable cove lighting.

With the new Radiant Serpentine LED system, the specifier can now only add the color and evening presence of a feature area, but ensure that the fixture is adjusted to suit the application. The sky is the limit

with Radiant's new field curvable outdoor flexible LED linear solution with RBG technology.

Radiant LED Power Cove System

When a powerful light output in a cove is needed, Radiant presents the newest in LED cove lighting for indoor applications. Individual modules of LED coupled with the possibility of optical lens accessories make this product a perfect solution for installations with difficult access. Now available with RGB technology with DMX control as well as its new curvable option, the Power Cove allows the specifier to create unique and colorful applications for any project.

The Radiant "Power Cove" LED System has aluminum die cast modules that house a constant current driver circuit with either 2 or four LEDs and a total power rating of up to eight Watts per module depending on LED type.
