

Cary Family Dental Dentist Completes Training on DuraTHIN Veneers

Dr. Allan Acton only one of 148 certified dentists in the country qualified to provide procedure

May 19, 2008 - [PRLog](#) -- CARY, NC – Cary Family Dental is pleased to announce that Dr. Allan Acton has recently completed training on the use of an ultra thin veneer on patients. The DuraTHIN veneer allows many people to have veneers without the need to remove any tooth structure. There are currently only four dentists in North Carolina that are certified to provide DuraTHIN, with Dr. Acton being the only dentist certified in the Triangle and central North Carolina area.

DuraTHIN is a type of prepless veneer, which eliminates the need for removing any natural tooth structure. This new advanced technology is perfect for those who would like to enhance their smile, but do not want to have their natural teeth drilled down in the process.

The DuraTHIN procedure leaves the natural tooth undisturbed underneath the porcelain veneers. The treatment is done with very little discomfort to the patient. In fact, in most cases, the procedure can be done without any numbing. Each DuraTHIN veneer is custom-designed to specific contours and shades and the extremely thin layer of porcelain is then bonded on top of the natural tooth.

Dr. Acton is pleased to be able to offer this new product to his patients and says that because the technology behind DuraTHIN's aesthetics and durability has stood the test of time, it was an ideal offering for his practice.

"I was drawn to DuraTHIN because it was an established, long-term solution for anyone looking to enhance their smile and personal appearance," says Dr. Acton. "Our patients trust the services and products we provide, and DuraTHIN fits well with our commitment to provide safe, effective, and proven dental care solutions."

Not all people are candidates for prepless veneers, but DuraTHIN does offer a new exciting alternative to many. The best candidates for DuraTHIN veneers are those that have worn down their natural tooth structure, people who have small teeth, patients who had teeth extracted for orthodontic reasons when they were young, or someone whose teeth simply need more presence. For more information, call Cary Family Dental at (919) 460-6884.
