

New Study: Paractin Shows Significant Reduction in Painful Joints, Inflammation and Rigidity

Biocentric Healthy Releases New Study Findings: Hydrflexin with Paractin shows a significant reduction in painful joints, inflammation and rigidity. For information or to order call 877-880-7800 or www.biocentrichealth.com/hydrflexin.html

June 11, 2008 - [PRLog](#) -- Biocentric Health, Gaithersburg MD, released findings of a new double blind study on Paractin, one of the two ingredients found in Hydrflexin the breakthrough all-natural joint and muscle pain formula. The Paractin study was conducted at a teaching hospital in Valdivia and Osorno, Chile and consisted of 58 female patients with rheumatoid arthritis (RA). RA is a chronic autoimmune disorder that causes the immune system to attack the joints, causing inflammation (arthritis). Women and individuals over the age of 60 are the most susceptible to RA. It can be a disabling and painful condition, which can lead to substantial loss of functioning mobility due to pain and joint destruction.

The 14 week study was supervised by a two rheumatologists who reported a significant reduction in joints pain, joints rigidity, fatigue, number of inflammatory joints and total grade of joint pain in the group taking Paractin vs. the Placebo Group.

Rick Popowitz, President and CEO of Biocentric Health commenting on the Valdivia and Osoro, Chile Paractin research said:

“ The just published study on the effects of Paractin on RA patients confirms the work of earlier researchers who demonstrated the anti-inflammatory and analgesic effects of this remarkable substance.”

Rick Popowitz went on to say “that in the two years since Biocentric Health first launched Hydrflexin with Paractin, response to the product has overwhelmingly been supportive with many customers reordering the product.. At last count over 15,000 people have ordered Hydrflexin and are now living a pain-free life.”
