

## Liebherr Introduces New Models in US

*At the Kitchen industry show in April, Liebherr introduced a 36 inch refrigerator to its range. Liebherr are committed to providing every solution to modern fridges and freezers and will look to bring the new model to the UK in the near future*

**June 18, 2008** - [PRLog](#) -- Appliance maker Liebherr will introduce its first 36-inch refrigeration unit for the U.S. market at the Kitchen/Bath Industry Show in April. The 2062 series, a French-door, Energy Star-rated platform, will be available in freestanding, fully-integrated, and stainless integrated designs, and is expected to begin shipping in May (view Liebherr models at : <http://www.internetkitchenappliances.co.uk/liebherr>)

Features include a dual refrigeration system with separate variable speed compressors for the refrigerator and the freezer compartments; double freezer drawers on telescopic rails; new LED light columns and enhanced vegetable drawer and freezer drawer LED illumination; advanced water filtration; an increased capacity icemaker that can produce 3.5 pounds of ice in 24 hours and store up to 7 pounds of cubes; an enhanced power cooling system for improved chilling performance; and new 6mm-thick glass shelving that holds up to 180 pounds

The new 2062 series of 36" refrigerators from Liebherr comes in stylish French doors allowing for better clearance than side-swing doors, a dual refrigeration system with separate variable speed compressors for the refrigerator and the freezer, double freezer drawers, new LED light columns and enhanced vegetable drawer and freezer drawer LED illumination.

Liebherr's programme of domestic appliances is noted for its brilliant concept, modern design and well-planned solutions for optimum user convenience. It includes table-top, free-standing and combined refrigerators and freezers, freezer chests, food storage and drink cooling refrigerators, wine cooling and wine-temperature control cabinets as well as refrigerators and freezers for commercial use.

Liebherr wine storage cabinets are ideal for storing wines for long periods of time to allow them to mature to perfection. With a constant supply of fresh air via activated charcoal filters and re-circulated air cooling, these appliances guarantee consistently high air quality during the maturing process. Specially developed compressors ensure that the wines are stored undisturbed.

Liebherr offers a comprehensive range of professional appliances for commercial use, with a combination of high refrigerating capacity, high quality workmanship and fittings tailor-made for commercial needs means that they fulfill the highest professional standards.

The Liebherr fridge freezers family business was established in 1949 by Hans Liebherr. The great success of his first mobile, easy-to-assemble and affordable tower crane was the foundation on which the company flourished. Today Liebherr is not only one of the world's leading manufacturers of construction machinery but is also an acknowledged supplier of technically innovative user-oriented products and services in numerous other fields. Over the years the family business has grown into what is today a group of companies, employing a workforce of approx. 26,000 in more than 100 companies on all continents.

The decentrally organized Liebherr Group is divided into company units of manageable size, operating independently. This is to ensure proximity to the customer and the ability to respond flexibly to market signals in global competition. Operative management of the production and sales companies for the individual product segments is in the hands of divisional control companies. The Liebherr Group's holding company is Liebherr-International AG in Bulle, Switzerland, which is entirely owned by members of the

Liebherr family. The family business is already in the hands of the second generation and is jointly managed by Isolde Liebherr and Willi Liebherr.
