

Hide IP address Software - SmartHide 2.1.131

By Arovax LLC

Dated: Jul 08, 2008

urrent hide IP address software has several new fatures. There has been created Personal IP Technology Support. Now every user can order personal IP address to surf the Internet absolutely protected.

Arovax LLC released a brand new, advanced SmartHide version, unique Hide IP Software unblocking blocked sites and used for Web anonymous surfing. Current hide IP address software version has a few modern features helping to hide IP smarter.

The most outstanding feature of new release is Personal IP Technology Support. Thanks to this service every Internet user can get personal IP address assigned only to him/her. Besides, Personal IP Technology Support allows working in Peer-to-Peer nets without any problems.

Earlier SmartHide versions worked through NAT that is why other Peer-to-Peer participants were not allowed to download files with the help of SmartHide. Current version of SmartHide makes it possible to work with Peer-to-Peer nets easily. Personal IP Technology Support helps to avoid such phenomenon like Low ID in eMule and others.

It is worthy to add that SmartHide has been localized into Russian. It extends the range of potential users.

One customer said: "It is amazing software helping to visit many blocked sites and just surf the Internet being fully protected. IMHO there is only one thing that is missing here - ability to have Personal IP address."

We respect our customers and we have created special Personal IP Technology Support to convenience every Internet user.

Complete change log of Arovax SmartHide v.2.1.131:

- *New: Personal IP Technology Support.
- *New: New format of the Servers List file.
- *New: Russian localization.
- *New: Internal support request routine is changed.
