

New Wind Turbine Employs Aerospace Technology

By Joliet technology press office

Dated: Jul 14, 2008

The Ultra x900 small wind turbine from Joliet Technology offers the very latest in light weight composite materials making it ideal for roof top mounting.

The striking new ULTRA X900 employs a lightweight aerospace composite blade design and three stage upward furling to guarantee maximum wind usage.

Aluminium, carbon fiber and marine grade stainless steel parts offer high performance in light and heavy winds.

Unique in its class, the ULTRA X900 features a choice of power outputs and a quick mount tower for easy deployment.

As well as offering many technical advantages over competing wind turbine products the ULTRA X900 offers a significant price advantage with prices for a complete kit starting at less than 3,000 GBP.

Extensive information and assistance in choosing the most appropriate wind turbine is available at www.joliet-wind-turbines.com

Joliet Technology is an international supplier of renewable energy equipment operating from headquarters in Northern Spain with offices in France, and the United Kingdom.

The company's general philosophy is to provide end users with well designed, user friendly equipment that can be easily installed and requires little or no maintenance. Above all the management believes that renewable energy based products should offer customers a real alternative to conventional energy sources without attracting a premium cost.

Joliet Technology SL also supplies a range of high power LED based street lighting systems, offering up to 80% energy savings over conventional street lights www.joliet-led-streetlight.com and domestic heat pump products www.joliet-europe.com
