

A new trilogy of novels - 'The Cyannian Trilogy' by Chris J Berry

By Chris J Berry

Dated: Jul 23, 2008

Published in hard back and soft cover, the Cyannian Trilogy, progressively takes the reader through a fantasy of predictive science fiction, describing events based on real issues facing us on Earth today.

The Cyannian Trilogy

Listening to various scientific bodies located around our world, I contemplate their submissions of doom. The diversity of opinion seems, at times, contradictory, and yet, as Earth reveals in her changing moods the threat to humanity's survival in the future, the majority of us continue to ignore her warning. The story of the Cyannian Trilogy opens in the first book with a catastrophic event that brings the current civilisation on Earth to an end. Complacent attitudes have been commonplace, thinking such violent changes were inconceivable on a world that for thousands of years had provided humanity with a stable existence.

Since my childhood, I have been subject to a spiritual influence from my mother's activities as a practising spiritual medium. Over the years, her beliefs have eroded my scepticism, and I have joined her, and her companions, in their concern for our world and the people on it. I have always felt that the solution to our problems must be a combined one. In my trilogy, the development of a brotherhood brings all the races together on Earth to live as one people. The significance behind this idea focuses on three fundamental points. How the subsequent technology developed conserves Earth's resources, the wealth of knowledge emerging shared universally among the new civilisation, free from possessive attitudes demonstrated by the individual nations of old, and finally, the revelation of a more in-depth understanding of the purpose for our lives here.

Life today is in the fast-lane. No one has time to pause and rationalise over the meaning of our existence. My trilogy has been influenced by witnessing the experiences my mother had as a practicing spiritual medium. The insight she gained arose from her obsession for the truth, and which led her to explore the life beyond where she found it. My story, though a fantasy, reflects many strange experiences that have occurred close to me during my life. Uses real and hypothetical situations that submit an idea of what is going on around us as we live out our lives.

Cataclysm Earth, describes events resultant of a world abused. Heritage from Cyan, suggests a solution that focuses on uniting the people of Earth. Avataria, the final book is symbolic of pre-cataclysmic Earth, and tells the story of how, and why it all went wrong. I do not possess all the answers. Following my years of scepticism, I have finally settled upon an idea to air my concerns for our world and its inhabitants, and have applied it in a story; touched by countless psychic experiences.

What is the Cyannian Trilogy about? A simple story simply told reveals a lot about me and my concerns for our world. Comments are welcome if you wish to contact me and Air your own concerns for humanity, our Earth and the creatures on it!

Having worked for the UK National Health Service for over thirty three years, I have been privy to many aspects of human tragedy. But what has captured my attention since, is the declining state of our world, resorting to writing to express my concerns.
