

MIE Solutions Announces MIE Exchange a B2B Buyer Supplier Portal

By Manufacturing Information Exchange Solutions

Dated: Aug 16, 2008

MIE Exchange enables buyers and suppliers to communicate through user defined communities which then allows Request For Quotes (RFQ), Bids, Bid Management, Purchase Orders, Catalog Management, Document Management and Inventory Management.

MIE Exchange is a web based service now available to help facilitate the communication business have when communicating Request For Quotes, Bids, Purchase Orders and document management. Free registration and trial are available by going to the web page <http://www.mie-exchange.com>

To see a video demo goto <http://demos.mie-web.com/mieexchange/mie.htm>

MIE Exchange is not a open bidding system where it does nothing but hurt your core business as buyers select the least expensive bid without looking at the quality of the relationship. MIE Exchange allows buyers to place an RFQ to their set of known suppliers which creates a more efficient process to create and award RFQ's. Suppliers have a single location for all their buyers to submit RFQs and Purchase Orders without the need of time consuming emailing and faxing.

With MIE Exchange there is no software to install because it runs using the latest Adobe Flex technology on the browser making the browser look like a desktop application. MIE Exchange has an open API which allows any application to communicate with the MIE Exchange database in order to import or export data directly into existing ERP and accounting systems. A B2B relationship is very important and MIE Exchange will help your company create an optimized relationship.

###

MIE Solutions is the leading provider of production control software for the entire manufacturing sector.
