**Aug. 24, 2008 - [PRLog](#) -- WATCH AND RECORD INTERNET TV & RADIO with CHRISTV ONLINE! 3.00**

Chris P.C. today announces its release of **ChrisTV Online! version 3.00**, a modern viewer and recorder of Internet TV and Radio channels with a large and up-to-date streams database.

Most computer users have broadband Internet connection and also love their favorite TV or Radio programs. More and more of these favorite programs are broadcasted and available on Internet, therefore can be accessed with a program like ChrisTV Online! by a simple search and play from its list of channels.

ChrisTV Online! comes along with a large collection (3760 distinct streams) of Internet TV channels (more than 1800), Radio channels (over 600), Video clips (Video on demand), recordings, live webcams from different location all around the world. The channels are grouped in categories like News, Music, Sports, Movies, Weather, Religion, Education, Shopping etc. The ergonomic graphical user interface allows filtering only those type of media streams you are interested: either online live TV channels or Radio programs, or both, or only recorded programs, also you can filter only broadband streams or modem streams. That makes life easy when looking for a specific type of stream. Having a modern interface, ChrisTV Online! gives the user the choice of selecting a specific view for the collection of streams: they can be grouped either by language, country of origin, category, type or just a plain alphabetical list of all streams.

### **Key features:**

ChrisTV Online! plays the Internet TV & Radio streams you select from its channels database.

One outstanding feature of ChrisTV Online! is that it can record the channel selected by the user in a media file in the specified folder.

Starting with version 3.00, you can manually add your own TV streams and enjoy the software multilanguage interface: English, German, Dutch.

You can use groupings or filtering of the streams collection or use the search screen which opens by pressing S key.

### **Price & subscriptions:**

ChrisTV Online! is shareware having a free trial period of 14 days with some limitations.

Becoming a registered user either purchasing a Basic Subscription (16 EUR/20 USD) or a Premium Subscription (25 EUR/30 USD) gives you access to the full product, periodic updates to the software and streams database (Basic Subscription 1 year updates, Premium Subscription LifeTime updates).
