

## **New Truck Bed Seating product turns your truck into an SUV - could save on Fuel Costs**

*Aug 25, 2008 Atlanta, Georgia Company seeks to save Fuel cost for Pick-up Truck owners.*

**Aug. 25, 2008** - [PRLog](#) -- If you are currently driving a pick-up truck or utilizing pick-ups in your service fleet, the BedRyder seating system could save you thousands of dollars per year on your fuel costs. By utilizing the BedRyder add-on seating system you can get two additional family members or work crew personnel safely to the game or the worksite without having to use an additional vehicle.

BedRyder seats are practical. Let's face it: when you look around at the cars and trucks next to you at a stop light, you typically see only 1 person in each vehicle. Doesn't it make more sense to have seats you can easily install when you need them, and take out when you don't? BedRyder allows you to drive a shorter/lighter vehicle that gets better fuel economy and can carry more passengers safely.

"Safety has always been my utmost priority in developing this product. After all – I initially designed this for my own kids", says BedRyder inventor Carey Hyde. The BedRyder seating system has undergone extensive testing and meets or exceeds all applicable FMVSS safety standards.

Many states have laws against riding loosely in the bed of a pick-up truck. However, most of those states also have exceptions for passengers who are properly belted or performing their job duties. There are also age restrictions. You can learn more about the BedRyder product as well as your particular state's exceptions at the BedRyder website: [www.BedRyder.com](http://www.BedRyder.com).

BedRyder seats are fun. Riding in open-air BedRyder seats is a blast! On a nice day people will choose the BedRyder seats over in-cab seating. Because you are belted into comfortable racing style seats you can sit back and enjoy the wind in your hair, and you can't beat the leg room! You can also drive your truck like you normally would without worrying that your passengers are getting tossed around. Once installed, the seats can be completely removed in seconds, leaving nothing in the bed to hinder other uses. The BedRyder seating system can be used in conjunction with truck caps and ladder racks. It can be used for transporting additional workers during the week and hunting, boating, camping or tailgating on the weekend.

If you could drive a smaller more fuel efficient vehicle, while transporting the same number of passengers or eliminate an additional vehicle traveling to the work-site or lake imagine how much money you could save on your fuel expenses.

For more information regarding the BedRyder seating system visit our website at [www.BedRyder.com](http://www.BedRyder.com).

###

About BedRyder Inc. is the manufacturer of a removeable truck bed seating device that allows a truck owner to quickly add additional passenger seating to their vehicle. The system can be completely removed in seconds (no tools needed) .
