*South Lake Tahoe, California – September 1st 2008 – Tahoe Web Service, a leader in the hosting industries, recently announced the addition of web 2.0 layouts as one of the options in the client control panel access.*

Tahoe Web Service introduces new web 2.0 layouts into its line of best-in-class hosting service.

South Lake Tahoe, California – September 1st 2008 – Tahoe Web Service, a leader in the hosting industries, recently announced the addition of web 2.0 layouts as one of the options in the client control panel access.

Tahoe Web Service web hosting program, in an effort to provide clients with the tools to develop powerful, cutting-edge websites for \$20.00 a month offers these new layouts “currently 6 with more on the way” will offer custom colors for each area of the website. Simple color choices make changing colors on the fly very easy. The layouts offer choices of page menu places from the top, bottom, right side or the left side.

Len Cavanaugh owner of Tahoe Web Service said. “These new layouts are amazing. The program was installed in a way to allow our clients to make quick and accurate changes to any page. We have tested and have received some positive feedback about these new layouts and are in the process of adding more web 2.0 layouts.”

Tim Green a Tahoe Web Service client said. “I was thrilled when Len contacted me to test out the new web 2.0 layouts with [www.everythingtahoe.com](http://www.everythingtahoe.com). I just started this website and was amazed just how fast and easy these layouts are. I am able to pick my own colors, look at the site and change colors at any time without the loss of any data.”

In addition to the new web 2.0 layouts. Tahoe Web Service also announced that they have arranged the banner maker into categories and have added 1500+ images for clients to choose from.

Tahoe Web Service is based on the sole principle of developing a close, long-term relationship with its clients. This relationship allows the company to work together with customers to create a profitable, dynamic web presence. Founded in early 2000, Tahoe Web Service has been providing web site hosting and design to a wide range of clients both in the United States and overseas. Currently, Tahoe Web Service has a diverse portfolio of solutions ranging from domain name services, own servers, ecommerce solutions including website marketing tools and advice. Tahoe Web Service is constantly making sure that clients have everything they need to succeed in the ever changing world of hosting and design.
