

SafeTrac enhances tracking power with UKFast solution

By Simon Dalley

Dated: Sep 05, 2008

Specialist tracking company SafeTrac has boosted its server processing power with provider UKFast to deliver even greater performance to its extensive client portfolio.

Specialist tracking service provider SafeTrac Solutions has further extended its data tracking capabilities by adding award-winning Total Support from hosting partner UKFast. The expanded solution will now enable SafeTrac to boost its industry leading tracking systems even further.

As a specialist in providing innovative and reliable tracking devices to various industries, SafeTrac requires powerful server processing and extensive storage capacity. In conjunction with hosting firm UKFast, SafeTrac has already established a reputation as one of the most trusted names in its sector but now the company is taking its business to ambitious new heights by boosting its UKFast server support.

SafeTrac has added UKFast's award-winning Total Cover plan, a comprehensive server monitoring and support solution that incorporates unrivalled storage provision. With this added capacity, SafeTrac will be able to deliver even greater tracking performance to a client list that includes major retail, energy and transport companies.

SafeTrac's portfolio of bespoke tracking solutions include vehicle, marine and personal tracking devices that use state-of-the-art GSM, GPS, GPRS and satellite technology. The company also provides asset tracking and monitoring products.

For more information on SafeTrac's comprehensive line of tracking solutions call 01202 863 770 or visit <http://www.safetrac-solutions.com>. To find out about SafeTrac's hosting partner UKFast call 0800 458 4545 or visit <http://www.ukfast.co.uk>.
