

Is It Possible To Have A Home Security System with NO MONTHLY FEE that Calls YOU?

By ATSECURITY

Dated: Oct 25, 2008

Yes! Instead of a costly monitoring company calling the police, the person receiving the call is notified immediately and can call the police. Practical and highly effective security - what a novel concept.

Today we are announcing the release of a new monthly home monitoring system with no monthly fee.

A Security System that Calls You!

Protector Plus Dial-Up Home Security System - Save 50%

WEATHER RESISTANT

Works great indoors & outdoors!

When triggered, the Protector Plus Voice Dialer Wireless Home Security System sounds a screaming siren, flashes lights and automatically phones 4 pre-set numbers to provide your home & family with maximum protection. Order Today and give yourself and your family peace of mind when you're home or away with NO MONTHLY FEES!

Sold Separately: \$199.93

NOW ONLY: \$99.99

You Save: \$99.94 (50%)

Affordable Home Surveillance!

Unbeatable 3-Way Protection

When the Protector Plus Voice Dialer Wireless Home Security System is triggered by a door or window sensor, motion detector, or panic button, it sounds a powerful 85dB siren, flashes lights, and calls 4 phone numbers - be it your own cell or work phone, your family, neighbors or friends. It then plays a "security

alert message" (that you've recorded). If the first number doesn't answer, it phones the next, and so on - and it's not fooled by answering machines. Once someone is reached, they can listen in to your house directly through the Protector Plus Voice Dialer.

No Monthly Monitoring Fees!

With the Protector Plus Voice Dialer, you will never pay any hefty monthly monitoring fees - and you still receive great protection and security.

Rapid Emergency Response

Instead of a costly monitoring company calling the police, the person receiving the call is notified immediately and can call the police. Practical and highly effective security - what a novel concept.

Avoid Costly False Alarms

When the voice dialer calls, the person receiving the call can listen directly through the Protector Plus Voice Dialer to discover if it's a false alarm instantly. That means no unneeded police and no additional false alarm costs.

Wireless State-of-the-Art 16-Zone Security

It's wireless and it's cool! It's also extremely easy to install - no new wiring of your home and no security technician is needed. IT allows for complete security with 16-zone coverage of your house - through the wireless motion, door & window sensors. The screaming siren, flashing lights and voice-dialer adds that extra protection that you'll want for your home and family.

Protection While Home and Away

It allows for the normal armed-protection for when you're away, but also for when you're in your house. In the home mode, the motion detectors are turned off while the door and window sensors remain active. Thus, you can walk around your house and still be protected at all times.

Other Product Features

Sounds siren, flashes lights & calls 4 telephone numbers you select (no monthly monitoring fees).

Monitor up to 16 different zones (LED's shows status)

Installs within minutes: sensors use RF (radio frequency) signals, not wires.

AC-Powered with emergency backup battery in case of power outage.

Supervised sensors report low battery/tampering.

Add up to 8 keychain/handheld remotes for control over security system (key fobs include panic button).

Add up to 16 different window, door and motion sensors.

Home Automation enabled: Control up to 256 different lights & Appliances.
