

Laboratory Testing Inc. Exhibiting at Power-Gen Show

By Sharon Bentzley/Laboratory Testing Inc.

Dated: Oct 30, 2008

Laboratory Testing Inc. will be exhibiting at Power-Gen International in Orlando, FL from December 2-4, 2008. Laboratory Testing is one of the leading materials testing laboratories serving the power generation industry.

HATFIELD, PA -- Laboratory Testing Inc. (LTI) will be exhibiting in Booth #4138 at the Power-Gen International Show in Orlando, Florida from December 2-4, 2008. This show is one of the world's largest electric power generation exhibitions and conferences. Laboratory Testing Inc. is one of the leading materials testing laboratories serving the power generation industry.

LTI provides the industry with mechanical, chemical, metallurgical and nondestructive testing of metals and other materials, as well as failure analysis, test specimen machining and calibration services. The company's services are PRI/Nadcap and A2LA accredited to ISO/IEC 17025. All customers receive a Certified Report for each order listing detailed testing or calibration results to meet their audit and quality requirements.

###

Laboratory Testing Inc. has been in business since 1984 specializing in materials testing, nondestructive testing, specimen machining, failure analysis and calibration services. Information is available at www.labtesting.com and 800-219-9095. The laboratory services are accredited to ISO/IEC 17025 by PRI/Nadcap and A2LA. Mechanical, chemical, metallurgical and nondestructive testing services are performed on metals, alloys and other materials. Chemical analysis is also offered for other materials including powdered metals, ores, ferroalloys, composites, ceramics, aerospace materials and nuclear materials. Information on Laboratory Testing services and accreditations is available at www.labtesting.com, sales@labtesting.com or 800-784-2882.
