

## **Neverland Dreams/Skinzation Announces Worldwide Distribution of 100% Natural Skin Care Products**

*By Skinzation*

*Dated: Nov 04, 2008*

*Prawns on the Barbie, Kangaroos, Koala Bears, Crocodile Dundee, and Now From the Land Down Under, Comes a Revolutionary Secret Formula Created With 100% Natural Ingredients For The Relief of Itchy Dry Skin.*

An original Australian native, Wendy Kelly, has developed a formula made from 100% pure olive oil and other 100% essential oils, and pure sea salt, for mild to severe cases of painful itchy dry skin.

### **BRISBANE, AUSTRALIA**

An Australian native, Wendy Kelly, not being able to find any relief for her severe skin irritations decided to try to develop a formula that would work for her skin. Having this condition for most of her life, she was desperate for any effective long term relief.

The health food stores and the chemists in Australia had nothing that would give her any consistent relief. Researching, she studied how 100% olive oil and pure sea salt could be combined and applied to help heal and moisturize her skin.

Living in Australia, Ms. Kelly, was able to purchase the Australian 100% pure olive oil, as well as several other 100% essential oils, and started experimenting with these ingredients to perfect a solution for her skin problems.

After many years of testing and premixing of oils and pure sea salt, she now has a product that works for her skin, with no side effects. She has developed a Body Wash, Body Oil and a Pure Natural Soap. All with only 100% natural ingredients, no additives, preservatives, perfumes, and other potential cancer causing ingredients.

After developing her formula for herself, she was excited about being able to help others with mild to severe painful dry skin problems. She then went forward with producing her products to market in her home Australia, using the name Neverland Dreams/Skinzation for her woman's line of products.

Ms. Kelly, now is going to market on the Internet to make this line available to the entire world on her web site, [www.neverlanddreams.com](http://www.neverlanddreams.com)

Ms. Kelly says, "It didn't take any time at all after developing and using my formula that I started to attract the attention of our handsome Aussie gentlemen. I now have the love of a wonderful man, who truly loves and appreciates me. And also, who loves to touch my wonderfully smelling, soft, smooth, beautiful skin."

Other products for women are currently being tested using only Australian 100% olive oil and all pure natural ingredients. Plans for developing a line of men's products are now being tested, and could be available as early as the end of next year.

Adamant about using only Australian 100% olive oil, Ms. Kelly pointed out that Australian olive oil is the

only one she will use due to the strict Australian laws put in place to ensure purity. Only quality ingredients are used in Neverland Dreams/Skinzation products.

Not only do these products relieve the painful, irritating itch of dry skin, but they also make the skin soft, smooth, moisturized, with a smooth polished luster. Because of the 100% natural smelling essential oils, the skin also has a wonderfully healthy smell.

The Skinzation products have received very good reviews from current customers. They have praised the products for their effectiveness and long term relief. Also, that this was the first time they had really found true relief for their skin after trying many, many other products, and spending hundreds of dollars for products that didn't work or did not live up to their promises.

Some of the customers have expressed how youthful their skin looks, and how it has helped to smooth fine lines and wrinkles. Also expressed was the way it helped in the healing of extremely dry diabetic skin. Most have said they would highly recommend it to others with dry skin problems.

Because of her knowledge of combining natural ingredients for healthy skin, and aromatherapy; Ms. Kelly is becoming quite an expert in these two fields, successfully producing products that do not harm the skin, but are beneficial to both mind and body.
