

Search Engine Optimization Specialist Clyde Thorburn Gives Facts About Articles In SEO Part 26

By Clyde Thorburn SEO Specialist

Dated: Nov 10, 2008

Search engine optimization SEO services specialist Clyde Thorburn from Johannesburg South Africa will place and maintain your business website on the first page of the Google search engine.

(JOHANNESBURG, SOUTH AFRICA). **Search Engine Optimization SEO Services Specialist** Clyde Thorburn in Johannesburg South Africa will provide you with **search engine optimization specialist services** that will create and maintain a first page ranking for your business or personal website on the **Google Search Engine**. These **search engine optimization services** include promoting and marketing your website on the **Google search engine** only, advertising promoting and marketing your **web site** with specific content posting and increasing traffic to your website due to **Google search engine** exposure.

"On the other hand, if you are approached by a client asking questions about your business and you do not know all the details of your program or business, as a **SEO search engine optimization** services specialist or professional internet marketer, what will the result be? People will pick up immediately that you cannot answer specifics about your program. They will not join your program. They will join one of your competitors programs. It is as simple as that" said Clyde Thorburn, a work at home Internet Marketer, Veretekk Gold level subscriber and Veretekk Trainer.

Clyde went on to say, "So, as a result of you not taking the initiative and sacrificing your time and effort, as an **SEO specialist** or professional internet marketer, to constantly remain abreast of your program details, you lost a client, money and profits. Final result is that your business fails and you quit. The reason for quitting was you and your lack of self discipline, not the state of the program or business you are or were promoting. If you are not prepared to sacrifice time, money and effort for a long time in your **SEO** or internet marketing business, just like in any formal corporate job, then quit now because you will not succeed".

Clyde said that, "So, in developing this mindset as a true professional internet marketer or **SEO search engine optimization specialist** you will magnify your results from the start. This is the goal to strive for in **SEO** and internet marketing. The aim as a **SEO search engine optimization** services specialist is to place your website or client's website on the first page of the **Google search engine** in a high traffic area and have people call you or your client about the business or program that the related website is marketing".

Clyde continued to say that, "There is no greater measure of successful **SEO** or internet marketing than people calling you about your product instead of you going the usual painful route of advertising and begging people to join your business. Cold calling is not what you want to be doing. This is advertising. It is invasive to people and does not work on the internet anymore. The whole point of **SEO search engine optimization** is to get your website noticed on the internet through the **search engines**. The most significant way to do this is to write content and submit this content to many content submission companies like Ideamarketers.com".
