Many people have the dream of being able to get out of debt, spend more time with their family or have that better quality of life so that they can come and go as they please, and able to take vacations of the wildest dreams. But they are not able to enjoy all these because of the debt crisis that they face.

“Individual debt is at an all-time record high, in the hundreds of Billions, and is growing 23 times faster than the economy... with no end in sight. 80% of the Country (USA) is Upside Down on Debt to Equity,” stated Dr Tom Tinney.

“Of every \$100 spent by consumers, nearly \$43 is by use of credit and bankruptcies have doubled in ten years. For the first time in history, we are spending \$1.05 for every dollar we make. A country cannot thrive with an imploding middle class.” Tom added.

Imagine walking into a car dealership and not even looking at the finance option and paying cash on the spot because you are free from debt and can pay cash for everything! If you are not experiencing that right now it's not your fault. It's because when you came into the industry someone fed you all the hype! What they didn't tell you is that they were secretly spending \$20,000, 30, 40, and 50,000 a month on advertising to get to those levels of incomes.
