

Texas Entrepreneur Finds Success in Clean Energy Solution for Rising Fuel Costs

By Art F. Ledezma, Jr.

Dated: Nov 14, 2008

Bottom line is, you can't treat or solve a petrochemical problem or situation with a petrochemical. Ethos is non-petrochemical, non-toxic, non-hazardous, non-solvent, and will NOT invalidate vehicle warranty. Used with any type fuel

There has been a lot of concerns surrounding the cost of fuel and finding a solution that will fight the escalating prices as well as reducing harmful emissions, while improving both fuel mileage and engine performance. Ethos Environmental, Inc.

24-7PressRelease/ - GOODLETTSVILLE, TN, July 25, 2008 - There has been a lot of concerns surrounding the cost of fuel and finding a solution that will fight the escalating prices as well as reducing harmful emissions, while improving both fuel mileage and engine performance. Ethos Environmental, Inc. (ETEV.OB), a San Diego-based corporation may have just found the answer to that probing question with their award-winning "Fuel Re-formulator" that helps industries meet environmental regulations and relieve skyrocketing fuel costs.

Ethos FR an ester-based fuel reformulating product helps vehicles increase fuel mileage between 7 percent and 19 percent, while reducing harmful emissions by more than 30 percent. Cities around the world have been using this product for a few years including Shanghai for soccer's World Cup in 2010, Beijing China home of the 2008 Olympics, where the air quality will be noticeably better due to reduced emissions from the city's buses and other vehicles and there is a increased demand for the Ethos Fuel Reformulating products throughout the European Union's 27 member states. Ethos FR is also gaining recognition in the United States and more recently the city of North Miami has decided to make Ethos Fuel Reformulator a part of their environmental plan in all of their municipal vehicles.

The company also has a home based distribution program where associates like Art F. Ledezma can become an Ethos Ecomates Distributor and earn an income with a great

product. Having an entrepreneurial spirit and being self-employed for 11 years in sales, management, marketing, supervisory, merchandising and exporting, Art joined the company over 2 years ago after trying the product on one of his cars and noticed a instant change in the vehicle's operation. The normal white puff of smoke that came out on morning start ups disappeared. The engine sounds quieter, it ran smoother and it felt stronger and ran cooler. It was then he decided that this unique product was much needed for himself as well anyone consuming fossil fuels and or any other kind of fuels and in his own words he stated, "I saw one of the best product and opportunity available that everyone could use due to its massive appeal".

Art sees the benefit of this product and he hopes to continue building the business for himself as well as help those who want to help themselves to build an organization, while creating a huge income stream to invest in the future. He is also hoping to help others save a significant amount of money on fuel, maintenance and repair costs, while reducing toxic, harmful emissions to slow down Global Warming by eventually discontinuing the use of fossil fuels and finally to continue spreading the word and this great product and opportunity world-wide.

###

We market, advertise, promote an 11 year old commercial product that's safe, non-toxic, non-flammable, non-petrochemical, non-hazardous, easy-to-use, Earth Friendly, Green, it decreases fuel costs 7% to 19%, decreases toxic, harmful emissions 30% minimum.

Bottom line is, you can't treat or solve a petrochemical problem or situation with a petrochemical. Ethos is non-petrochemical, non-toxic, non-hazardous, non-solvent, and will NOT invalidate vehicle warranty.

Can be used with any type fuel, any type engine, anywhere.

We've been using Ethos FR since May 2006 I have never seen anything work as good as this before.

I am amazed at how long it lasts. It's like giving a 50 dollar bill and getting back a 100 dollar bill.
