*DRP Consulting, Inc. Launches DTSManger.com, Construction Project Management Software*

IRVINE, CA – DRP Consulting, Inc., a leading business and IT solutions consultancy, has launched DTSManger.com, an innovative website where general contractors, construction managers, consultants and subcontractors can learn more about the new DTS Manager, a construction project management application developed by Sam Elshiwick and his team of engineers at DRP Consulting, Inc.

“We have created a very user-friendly project management solution that accelerates and streamlines all projects and makes it easy for users to track, manage, and share project information. DTS Manager is easy-to-use, flexible, cost-effective and is built for any construction project, large or small,” said Elshiwick.

In an industry that wastes billions of dollars each year due to poor communication and delays, DTS Manager supplies convenient, real-time information to keep a project on track and on time, with maximum productivity. While other products on the market are expensive-to-buy, slow-to-set up, DTS Manager accelerates and streamlines all projects and provides the most user-friendly software on the market, providing an immediate return on investment. Some of the most useful features include:

- Over 160 customizable reports
- Interactive, user friendly interface
- Auto-generated transmittals and submittals
- RFIs
- Project cost tracking
- Change orders

###

About DRP Consulting, Inc.

Headquartered in Irvine, California, DTS Manager was created by the President and Founder of DRP Consulting, Inc., Sam Elshiwick, with a vision of simplifying the construction project management process with software that replaces the expensive and complex project management systems on the market today. DRP has created the most user-friendly software on the market for General Contractors, Construction

Managers, Consultants and Subcontractors, offering immediate benefits with reduced risks and costs. Built on Microsoft SQL Server, database platform, DTS delivers robust, reliable and scalable performance.
