

## Effect of Change of VAT on EPOS Systems

By Harmony Business

Dated: Dec 04, 2008

*The change in VAT means many businesses in the hospitality industry will have to change the cost of items on their EPOS and till systems.*

As the chancellor's new VAT changes take effect it may be necessary for customers to change their EPOS systems. Instead of an unwanted change this can be used as an excellent opportunity for customers to upgrade their EPOS systems. Improvements here can mean improvements in profits through better stock control and more efficient use of employees' time.

As always Harmony offered a first class service to customers using EPOS systems whether it is a single till through to fully networked systems. Please contact us direct if you need further information. Harmony can help whether you are using this as an opportunity to save time and resources by upgrading to a new product, or you need help with your existing systems.
