WAYNE, PA - Brockport Home Systems, one of Canada's first construction companies dedicated to enhancing the design, manufacture and construction of house components for the home building industry, has implemented the DEACOM Integrated Accounting and Enterprise Resource Planning (ERP) Software System to streamline its business processes in a single, integrated system.

A fully-automated plant, Brockport Home Systems uses the DEACOM system to supply wall panels to home builders such as Great Gulf Homes. The DEACOM System was selected based on its integrated functionality, which is specific to the building component industry, and its experience with the Canadian market.

"We wanted an integrated software system that is geared toward our industry with minimal customization," says Kamal Sabarathnam, General Manager of Brockport. "DEACOM gives us just that - the ability to adjust our lumber prices in bulk, automatically log user changes to the system, and manage our Canadian taxes - all in one system."

Since going live on the DEACOM System in the summer of 2008, Brockport Home Systems manages its accounting, labor tracking, production, inventory control, engineering links, purchasing, and sales order entry processes in one software system. DEACOM gives Brockport Home Systems the ability to plan for material requirements by date as well as link its scheduling to the shop floor for accurate job costing information.

To learn more about the DEACOM Integrated Accounting and ERP Software System or to schedule an online demonstration, call 610-971-2278 ext. 15 or visit [www.deacom.net](http://www.deacom.net).
