

## Procore Named Sage Construction and Real Estate Development Partner For Second Year

*By Procore Technologies, Inc.*

*Dated: Dec 15, 2008*

*Procore Technologies, Inc., makers of Procore construction software, has been accepted into the Sage Construction and Real Estate Development Partner Program for the second consecutive year.*

Procore Technologies, Inc. has been accepted into the Sage Construction and Real Estate Development Partner Program for the second consecutive year. Procore provides web-based construction project management software that enables Sage Timberline Office users to view job cost data and vendor information via the Internet. Authorized Procore users can access the Sage Timberline Office data from any web-connected device, including laptop computers or smart phones such as Apple iPhones and RIM Blackberry devices.

Procore CEO Tooey Courtemanche noted the benefits of Procore's involvement in Sage's Construction and Real Estate Development Partner program during the past year. "As a result of technical support and documentation provided by Sage, Procore has been able to integrate our online construction software with Sage Timberline Office. We have also been able to market Procore's construction software through Sage's independent Business Partners, a new sales channel which has resulted in additional revenues for Procore. We are planning to bring an even greater number of innovations to our customers during our next year of participation in the Sage Construction and Real Estate Development Partner program."

"Procore's online construction software provides our customers with the ability to view Sage Timberline Office job cost data from any Internet connection, in the field or at the job site," said Monique Devine, Director, Sage Construction and Real Estate Development Partner Program. "The ability to extend Sage Timberline Office's capabilities through third-party applications is what makes the Sage Construction and Real Estate Development Partner program so valuable for our customers."

###

### About Procore Technologies:

Procore Technologies, Inc. provides web-based construction project management software to commercial and residential contractors, architects, engineers and developers. Procore helps construction professionals manage project schedules, track communications and organize project change orders, requests-for-information (RFIs), submittals, daily job logs, and other types of construction project data. The company was founded in 2003 and is based in Santa Barbara, CA. For more information on Procore, call 866-477-6267, email [sales@procore.com](mailto:sales@procore.com) or visit Procore's web site at <http://www.procore.com>.
