

Guyana Gold Corp. Announces Contract Negotiations

Guyana Gold in in the process of negotiating a contract for subsonic mapping of its vast gold reserves to obtain firm data on the amount of reserves contained within its contracted area.

Dec. 30, 2008 - [PRLog](#) -- Guyana Gold in in the process of negotiating a contract for subsonic mapping of its vast gold reserves to obtain firm data on the amount of reserves contained within its contracted area. This state of the art mapping technique is one of the most cost effective ways to establish the total reserves available within its contract area as well as to direct management to focus on the richest reserves in the area. This information is invaluable to the company and is new technology to the Guyana region. the company is very excited about this new survey of its know gold reserves.

#

Guyana Gold Corp. is a junior mineral exploration company that specializes in identifying, acquiring and developing precious and base metal properties as well as assessing whether certain claims possess exploitable commercial and precious mineral reserves
