

Information On Heart Attack Symptoms For Women And Men Is There Something They are not Telling Us?

Heart attacks kill almost 700,000 people each year in the US alone. Well what causes heart attack and what are the kinds of heart attack disease? There seems to be one major thing that leads to heart problems, we are not being told about it why?

Jan. 6, 2009 - [PRLog](#) -- Heart attack symptoms women and men are pretty much the same as they are for males. Discomfort in the Chest also in other areas like Arms,neck,Back,stomach or Jaw. Shortness of breath, cold sweats and dizziness however there is a tendency for a women to experience nausea,dizziness or anxiety more so than men

Heart attacks kill almost 700,000 men and women each year in the US alone. Well what causes heart attack and what are the kinds of heart attack disease? Over the years there have been many claims made by the medical fraternity, Drug company's and dietitians about what leads to or causes Heart Disease which leads to /Heart attacks.

But there seems to be one major thing that leads to heart problems and we are not being told about it why. I came across this Video (it's a bit tongue in cheek) but it hits the nail on the head me thinks. Take a Little look only goes for a minute or so.

So what is the thing they are not letting us in on "INFLAMMATION" find out more....
