

DryPro® PICC line helps physicians give their patients better treatment and quality of life.

By *DRYCorp LLC*

Dated: Jan 20, 2009

Physicians such as : Oncologists, Infectious Disease Doctors, Cardiologists, Orthopedic Surgeons, Gastroenterologists, Family Practice and Internal Medicine Physicians find our product very beneficial to their patients.

You will find that using the Latex Free Dry Pro® as a PICC line cover for your patients will allow them to shower and swim while keeping the area covered dry. This helps to keep bacteria and other contaminants away from the vein the PICC is inserted in. With a Dry Pro® Latex Free PICC line cover, the area around the vein can be kept completely dry whether in the shower or the ocean.

Physicians prescribing infusion therapy for antibiotics, chemotherapy, hydration, or TPN (total parental nutrition) through a PICC line can recommend our product to their patients, thus increasing the patients quality of life while keeping the PICC Line secure, dry, and bacteria free. Vascular Access health care professionals, infusion nurses and home infusion companies are using our PICC protector to keep there patients level of health and quality of life high.

The Dry Pro® uses our same vacuum seal over the PICC or IV line, but is tan colored and open on both ends to keep the patient's hands free for use. One can shower, bath, or swim with a PICC line, with complete waterproof protection.

The benefits of the DryPro® PICC Line are numerous:

- Significantly reduces the risk of infection by keeping moisture out and therefore decreasing the growth of bacteria
- Lowers the risk of pulling the PICC Line out by accident when bathing or swimming
- Gives the patient freedom to shower, bathe, swim at beach or pool, which increases patient satisfaction and quality of life
- Decreases cost to patients, insurance companies, and patient hassle/pain by decreasing PICC Line replacements

For more information on the DryPro® PICC line take a look at our website: www.store.drycorp.com or contact our sales department at sales@drycorp.com.

###

Dry Corp manufactures and distributes waterproof body protection for casts, bandages, PICC line, prosthetic and Ostomy. Dry Pro works on a vacuum seal to keep the cast, bandage or Prosthesis completely dry while showering, bathing and even swimming.

The Dry Pro® is available online at www.store.DryCorp.com. The Dry Pro® is a product of Dry Corp, LLC, headquartered at 349 Military Cutoff Drive in Wilmington, NC.
